FERC...You've got to be kidding me. You issued a notice to proceed construction of the pipeline in Pittsylvania County knowing full-well that MVP is not complying with our local Zoning Ordinance? I think of all the people trying to make sense out of this convoluted process and finally, I understand. There is no understanding of the process. Just step out of the way of the bulldozers and be helpless...because the system works that way. Congratulations to you on turning our zoning ordinance into toilet paper too coarse to even use on ones ass.

Subject: MVP to proceed with construction

Ms. Hayes,

NTP 7 fc.pdf (attached) states MVP has been granted their request to proceed with construction on Pittsylvania County. MVP does not have, nor have they applied for, Special Use Permits for permanent easements greater than 40 feet in width in accordance with 35-50 of Pittsylvania County's Zoning Ordinance. MVP does not have, nor have they applied for, Special Use Permits for the additional 75 feet for construction easements. MVP has not had it's property rezoned for the gas transmission facility nor has it applied for the Special Use Permit that is required for the lay-down yard that will be located on the not yet rezoned property. MVP does not have, nor has it applied for Special Use Permits on C-1 (conservation Districts) on it's path as required by the Ordinance.

NTP 7 fc.pdf states there will be 6 yards, 91 additional temporary work spaces and 11 ancillary areas. If these are located within Pittsylvania County, these are subject to our Zoning Ordinance and require Special Use Permits in A-1, R-1 and B-1. A-1, R-1, B-1 and C-1 constitute a majority of the properties which have pipeline easements in place.

The Zoning office has likely not been given the locations of areas where these temporary uses will be located as evidenced by Mr. Pichardo's evasion of the question at the February 13, 2018 BZA meeting. I ask that you request the locations of the "6 yards", 91 additional temporary work spaces, and 11 ancillary areas that MVP has documented with FERC to determine how many will be located, and where they'll be located, in Pittsylvania County. When you receive the information, I request that you forward copies to me.

I further request that in your capacity as Zoning Administrator, that you send written correspondence to Mr. Pichardo, EQT Senoir Attorney, asking

when EQT/MVP plan to apply for the Special Use Permits required by our Zoning Ordinance.

Thank you,
Karen B. Maute
