

Sheridan Gump, Metz, WV.

Reconsider letting the Mountain Valley Pipeline continue to infringe on landowners rights in West Virginia. Surely there can be a way that the pipe line can be built without taking property from landowners who do not want the life style that they have worked so hard to maintain taken from them. Most WV citizens want what is best for the state but nobbody needs property taken so big corporations can pad their own pockets without even negotiating fairly by letting the consenting landowners share in the continuous value this pipe line gives to a company but only a 1 time payment to the landowner that seems undervalued. There has to be away that these pipelines can be built with consenting landowners. Please stop the MVP project from taking US citizens rights untill a fair compromise can be developed. I urge you to consider WV citizens rights in this case and any future cases of similar .

Thanks for your time,
Sheridan Gump
