**PRESERVE CRAIG AND INDIAN CREEK WATERSHED ASSOCIATION’S
OBJECTION TO EXPEDITED CONSTRUCTION APPROVALS**

Preserve Craig and Indian Creek Watershed Association write to object to the Office of Energy Projects (“OEP”) Staff’s recent actions to approve Mountain Valley Pipeline, LLC’s (Mountain Valley) Request for Variance, in the form of revisions to the General Blasting Plan (*see* eLibrary no. 20180327-5029 (Mar. 27, 2018)), and Request to Proceed No. 18 (*see* eLibrary no. 20180328-5005 (Mar. 28, 2018)) within hours of filing. As shown in the attached timelines, OEP Staff granted Mountain Valley’s Request for Variance less than four hours after it was filed, and approximately four hours before Mountain Valley served the Request on the parties. OEP Staff granted Request to Proceed No. 18 approximately two hours after it was filed, and approximately six hours before Mountain Valley served the Request on the parties. Action on this hasty schedule raises two primary concerns. The first goes to the adequacy of OEP Staff’s review. The second goes to the denial of parties’ opportunity to review and comment on the request prior to final decision.

The Commission delegated to the Director of OEP the authority to take action on activities and requests related to the construction and operation of the Mountain Valley Pipeline Project (MVP Project). *See* “Order Issuing Certificates and Granting Abandonment Authority,” 161 FERC ¶ 61,043 (Oct. 13, 2017) (Certificate Order), Appendix C, Environmental Condition 2. In order to exercise that authority in a manner that “ensure[s] the protection of all

environmental resources during construction and operation of the project” (*see id.*), Staff must undertake independent review of Mountain Valley’s requests to proceed or for variance. Same-day approval of requests does not appear adequate for that due diligence and, as described below, the letter orders on their face do not demonstrate that such due diligence occurred.

The Request for Variance proposed several revisions to Mountain Valley’s General Blasting Plan. This included an amendment to the General Provisions to permit use of detonators containing non-combined amounts of perchlorate and “emulsion type explosives, including those having ammonium nitrate as a constituent ... as these types of explosives are considered industry standard for area blasting related to large scale earthwork construction.” General Blasting Plan (as revised March 2018), p. 9. Mountain Valley did not explain the need for the apparent departure from its previously proposed procedures for targeted removal of bedrock if other less intrusive methods failed (*see, e.g.*, FEIS, eLibrary no. 20170623-4000 (June 23, 2017), p. 4-60 (Mountain Valley would use “low force charges designed to only affect the rock to be removed.”)). It does not explain why, if this new procedure is industry standard, it was not proposed prior to the Final Environmental Impact Statement (FEIS). OEP Staff’s letter order does not describe Staff’s review of the request or state any basis for the approval.

The Request to Proceed No. 18 requested authorization for “(i) all construction activities for the facilities listed in Attachment A and (ii) hand-felling of trees for the facilities listed in Attachment B.” In approving the request, OEP Staff stated that it had determined that the proposed activities for all 15 facilities identified were consistent with Mountain Valley’s Implementation Plan and Environmental Condition 9 and applicable Conditions 12 through 33 of the Certificate Order. *See* Notice to Proceed No. 18, eLibrary no. 20180328-3015 (Mar. 28,

2018), pp. 1-2. The letter order does not provide any specific description of Staff's consistency review.

OEP Staff's approval of Mountain Valley's requests to proceed and modify the project within hours of filing and prior to Mountain Valley's service of the requests, also deprives the parties of an opportunity to review and comment on the requests. We note that under the Commission's rules of procedure, the public is given five days to review and comment on motions requesting expedited action. 18 C.F.R. § 385.213(d)(1)(i). Plainly two hours falls well short of that, even considering that the requests relate to implementation of an existing Commission order.

Throughout this proceeding Preserve Craig and Indian Creek Watershed Association have advocated for protection of environmental resources that will be affected by the MVP Project. They requested rehearing of the Certificate Order based in part on arguments that the MVP Project would cause unnecessary and irreversible environmental harm. They have a plain interest in ensuring that Mountain Valley and OEP Staff act to ensure the protection of all environmental resources during any construction activities that occur while their rehearing request is pending and should be afforded an opportunity to review and comment on Mountain Valley's requests before OEP Staff takes final action. Denying them such opportunity compounds the due process concerns associated with OEP Staff authorizing construction to proceed despite the Commission's inaction on rehearing requests seeking vacatur and/or modification of the Certificate Order that have been pending for over four months.

CONCLUSION

Preserve Craig and Indian Creek Watershed Association request that OEP Staff allow a reasonable amount of time between Mountain Valley's requests related to construction and OEP

Staff's final action on such requests to allow for independent consistency review by OEP Staff and an opportunity for review and comment by parties.

Respectfully submitted,

To: Eggerding, Matthew MEggerding@eqt.com

Good Evening:

Mountain Valley Pipeline, LLC filed the following today in FERC Docket No. CP16-10-000:

- (1) Variance Request No. MVP-1 (Filing attached) and
- (2) Variance Request Nos. F-1 and G-2 (Transmittal attached).

Copies of the filed documents are attached as indicated and the public filings will be available on FERC's e-Library and Mountain Valley Pipeline's website. Thank you.

Regards,
Kelly
