

Arietta DuPre, Talcott, WV.
This is the only Docket I could find.

I would like to know who is governing MVP as to their actions? They are in trouble now for lying in the Monroe County, WV hearing held recently - this is an illegal action. On top of that, they have shown abuse to my horses, and that is unethical, immoral, illegal, and negligent. Not only to me, but to FERC as well. You have given them permission to ruin our lives, destroy our land values, and eventually kill wildlife, the environment, or domestic animals, and cause severe health problems BUT did you give them permission to act in immoral ways that shines a very poor light on you?

I will gladly send you copies of emails, and more if you will send me a link, but here is a short highlight of their actions:

- (a) They fenced my oldest horse (over 30 years old and blind in one eye) into pasture that offered no shelter from the snow storm. He ran the fence line until he was sweating thus I had to give him antibiotic shots for 4 days to ensure he did not get sick from getting so hot during a snow storm.
- (b) To fix (a), they fenced him into the other side of field where he could not get to water..... both without informing us they had done so, and touching my animals after being told "DO NOT TOUCH MY HORSES - come get me." Being on or touching any property not agreed upon with MVP and no monetary exchange is against the law.
- (c) They cut some of my electric fencing, tying it to a metal post and shorting out the fence, placed tree limbs on the fence, and cut one line, thus my youngest horse got out and was standing in the road.
- (d) I was told that once my horses were fenced out of any pasture, MVP would supply feed and hay to make up the difference, and as the loss became bigger, the feed would be adjusted. They have been fenced out of the back pasture for 2 weeks, and I have yet to see any feed or hay.
- (e) I was informed that they would lay a water line and provide a trough for the horses once work started ---- well it has started and all they are going to provide is water hoses (that I will have to roll up everytime I mow or work in the yard) and a trough- but to do this, I WILL HAVE TO BEAR THE EXPENSE of new fencing and supplies to enlarge what little pasture they will have left (they will be losing over 3/4 of their pasture), yet I am getting no monetary compensation for the expense (seems money is all MVP is interested in, so I will talk money).
- (f) They were making plans for the health and welfare of MY horses with the landowner instead of doing so with me. The landowner, nor MVP does/nor will be feeding, watering, caring for my animals, so speaking with the landowner was unethical. The care and welfare of my horses is STRICTLY MINE... no one else.
- (g) I had to pen my youngest horse in a pen as he was tearing down their "orange" drift fence. 2 weeks in the pen caused muscle loss and lack of eating. Of course, with the destruction done to my fence (c), he got out of field.

These are just a few of the situations I have been dealing with.... my health is suffering due to the stress and tension being caused. My sugar has been averaging 325+, my blood pressure has been high (been under control for years with my meds), my muscles are so tense I can't sleep, I have been keeping severe headaches and more.

If this is the kind of behavior you are supporting and endorsing, then our government has indeed gone "to pot." Since you are the ones giving them permission to screw the rest of us, it seems you would be monitoring their behavior. So far, I have seen nothing that could be considered "decency." The bold truth is they are also making FERC look like a joke - abusing the permissions you have given them.

I hope you will send me the needed link to forward emails and other information on this matter.

Thank you,
Arietta DuPre
