

Levi Helm, Charlottesville, VA.

My name is Levi, I am from Craig County, Virginia, just a few miles from the path of the Mountain Valley pipeline. I am writing to ask that the requests for rehearing be approved. I also ask that as Mountain Valley Pipeline submits requests, that the process is adequately vetted, with attention given to the concerns of local communities. Should MVP file for an extension for tree cutting, I ask that this request be denied. The MVP has not been shown to be necessary, and is an economic burden on the communities affected. Requests for construction should not be granted until the many concerns from the local communities have been adequately addressed. The local environment is not capable of supporting a pipeline without considerable environmental damage.
